

Classé bloom

0-0-8

Fruit & Flower Booster

GUARANTEED ANALYSIS:

Soluble Potash (K₂O) 8%

DERIVED FROM: Muriate of Potash

DIRECTIONS FOR USE:

Irrigation:

Mix 1 gallon of Classé Bloom per acre with a dilution rate of 20+ gallons of water per acre (10 acre block = 10 gallons of Classé Bloom in 200 gallons of water). Mix vigorously and keep the solution in constant agitation as it is applied through drip irrigation or sprinklers. After initial application, apply Classé Bloom as needed at a rate of 0.5 gallons Classé Bloom per acre with a dilution rate of 20+ gallons of water per acre.

Root Drench:

Mix 1 oz of Classé Bloom per 2 gallons of water. Apply 1+ gallons of mixed solution around the base of each plant to insure adequate coverage. May be applied through hose and sump pump or by other methods.

This material is not considered hazardous by the
OSHA Hazard Communication Standard (29 CFR 1910. 1200)

NOTE: When mixing Classé Bloom with other chemicals, all chemical labels should be read in their entirety to avoid potential and undesirable reactions, ensuring the compatibility based on the pH.
